# Grid Coordination Meeting Eileen Berman

### Scope of Grid in CD

- CMS data grid (includes USCMS grid)
- CDF & D0 (SAMGrid, CAF, use of OSG)
- SDSS, DES
- OSG at FNAL (contributions and project funded)
- Focus of Grid Facility Support is in the Grid Facilities Department

# GRID Facilities Department Mission

 To establish and maintain Fermilab as a high performance, robust, highly available, expertly supported and documented Premier Grid Facility which supports the scientific program based on Computing Division and Laboratory priorities. The department provides production infrastructure and software, together with leading edge and innovative computing solutions, to meet the needs of the Fermilab Grid community and takes a strong leadership role in the development and operation of the global computing infrastructure of the Open Science Grid.

- FY07 WBSs exist & are being followed
- Stakeholders & Managers can track
